Hi

I’m Nathaniel

High-performance image uploads

with CarrierWave

“Why is there a missing image on my site”

–Every client, ever

“Why does my app have memory issues”

–Every developer on Heroku, ever

“How do I get the photos off the Walmart CD”

–My mom

~~“How do I get the photos off the Walmart CD”~~

~~My mom~~

(Out of scope)

Workflow

- User POSTs image
- Process the image
- Upload results to S3
- 10 minutes go by… *crash*

wow
so lame
much crashing
halp
very timeout

First steps

- **CarrierWave Direct**
  — upload straight from browser to S3

- **CarrierWave Backgrounder**
  — process images in background

Oh wait

- **CarrierWave Direct**
  — upload straight from browser to S3

- **CarrierWave Backgrounder**
  — process images in background

Thank you
